**DETAILED ACTION**

***Response to Arguments***

1. Applicant's arguments filed 12/24/2008 have been fully considered but they are not persuasive.
2. In response to Applicants' arguments on page 7, lines 1-2, Applicants should note that in the office action mailed on 9/26/2008, elected claims, and not the non-elected claims, were rejected.
3. In response to Applicants' arguments on page 9, stating, "Examining the relied on sections ... recited in claim 1", and subsequent pages, Applicants should note Kirino, col 1, lines 28-33, col 2, lines 25-61, col 14, line 13 – col 15, line 5 and col 17, lines 14-31.
4. In response to Applicants' arguments on page 11, section 2, stating "Further regarding claim 24, ... recited in claim 24", Applicants should note that Kirino discloses: wherein the transmission device does not transmit the digital modulated wave when the frequency list is not updated within a previously determined period (does not transmit when the list is not updated, the predetermined time being the time it takes for the frequency list to be updated, see col 24, lines 62-67 and col 25, lines 1-12).

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-2, 4, 6, 9-12, 14, 17-18, 20 and 23-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Kirino (of record).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Regarding claims 1, 10-11, 18 and 23, Kirino discloses a transmission system comprising:

a transmission device (transmission apparatus 101, see Fig. 4) for receiving a list of frequencies (see col 15, lines 30-36) that are judged to be unlikely to cause mutually detrimental disturbance between themselves and the other users who are allowed to use a TV broadcast

frequency spectrum (see col 15, lines 1-5 and col 17, lines 24-29) by a public institution (see col 1, lines 28-33), and

transmitting a digital modulated wave using frequency in the frequency list (see col 15, lines 46-58), and

a reception device (receiving apparatus 117, see Fig. 4) for receiving the digital modulated wave transmitted from the transmission device (see Fig. 4).

Regarding claims 2 and 12, Kirino discloses the transmission device does not transmit the digital modulated wave when the frequency list is not updated within a previously defined period (does not transmit when the list is not updated, the predetermined time being the time it takes for the frequency list to be updated, see col 24, lines 62-67 and col 25, lines 1-12).

Regarding claims 4, 14 and 20, Kirino discloses the transmission device transmits the digital modulated wave through the air via radio waves, and the reception device receives the digital modulated wave transmitted through the air (see Fig. 4).

Regarding claim 6, Kirino discloses a plurality of the reception devices (transmission/reception apparatuses 201A and 201B, see col 19, lines 14-17).

Regarding claims 9 and 17, Kirino discloses the transmission device and the reception device perform transmission and reception of the digital modulated wave in the same building (see col 1, lines 28-33).

Regarding claim 24, Kirino discloses a transmission reception system (see Fig. 4) comprising:

a frequency list sending device (receiving apparatus 117, see Fig. 4) for sending (see col 15, lines 30-36) a list of frequencies (see col 15, lines 30-36) that are judged to be unlikely to

cause mutually detrimental disturbance between themselves and the other users who are allowed to use a TV broadcast frequency spectrum (see col 15, lines 1-5 and col 17, lines 24-29) by a public institution (see col 1, lines 28-33),

a transmission device (transmission apparatus 101, see Fig. 4) for receiving the frequency list (see col 15, lines 30-36) and transmitting a digital modulated wave using frequency in the frequency list (see col 15, lines 46-58), and

a reception device (receiving apparatus 117, see Fig. 4) for receiving the digital modulated wave transmitted from the transmission device (see Fig. 4),

wherein the transmission device does not transmit the digital modulated wave when the frequency list is not updated within a previously determined period (does not transmit when the list is not updated, the predetermined time being the time it takes for the frequency list to be updated, see col 24, lines 62-67 and col 25, lines 1-12).

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
